

Instructions To Install Sharp Printer Windows 7

- Click Start Menu
 - Open Devices & Printers
 - In the Devices & Printers Dialog Box click on "Add A Printer" at the top.
 - Select "Local printer attached to this computer"
 - Click Next
 - Select "Create a new port:"
 - In the drop down box choose "Standard TCP/IP Port"
 - Click Next
 - The Standard TCP/IP Printer Port Wizard will open, click Next.
 - Type IP address (do not change the port name): **192.168.4.250**
 - Uncheck "Query the printer and automatically select the driver to use"
 - Click Next
 - Select Sharp from Manufacturer List in the left box
 - Select MX4501N PCL6 from Printers List in the right box
 - Click Next
 - Check "Use the drivers that are currently installed (recommended)
 - Click Next
 - Click Next
 - Select "Do not share this printer"
 - Click Next
 - Do you want to use this printer as your default printer? Select which works best for you
 - Click Finish
-
- Back in the Devices & Printers menu you should see the Sharp MX-4501N PCL6
 - Double click the Sharp printer
 - Double click "Customize Your Printer"
 - Choose Properties (at the very bottom of the menu)
 - Check "Data Security Kit"
 - Click on the Advanced tab at the top
 - Click on Printing Defaults
 - Click on the Job Handling tab at the top
 - Check "Auto Job Control Review" at the bottom
 - If you wish to save your number (on your laptop ONLY) check "User Number" and enter your number
 - Click on Color tab at the top
 - Select Black and White under "Color Mode"
 - Check "Text to Black" below Color Adjustment button
 - Click OK, and then OK.
 - To print a test page, right click on the Sharp printer, select Properties, then click on "Print Test Page". You should be asked for your number and a test page should print.
